My name is Pierce Jorgensen. I'm a music producer and programmer. Electronic music has been a huge part of my life ever since I was young. I grew up listening to artists like Above & Beyond, Adventure Club, Skrillex, DeadMau5, and Eric Prydz. Dance music is in my blood.

I was born in San Diego, and I've lived in many places across the U.S. After I graduated, I moved to the East Coast for work. I'm a software engineer by trade, working in Aerospace ever since I got out of school. I've been very fortunate to be in this field and even got to work at the Kennedy Space Center, which was a life-long dream of mine. Working on the Space Coast was really awesome, and I enjoy living in Florida, but I've always had a pulse for music and I know it's my true calling in life.

Insomniac would be the perfect job for me. I can't think of anyone else I'd rather work for. I want to give back to the community that helped me find myself, and show others the importance of peace, love, and unity by making experiences that matter. I want my work to align with my values, just as much as my personal life. Below is a list of the values I hold and how I try to live my life.

1. Choose not to harm, choose love instead.
2. Respect nature, respect others, respect yourself.
3. Work first, play second.
4. Never stop learning.
5. Don't try to be better than other people, be better than yourself.
6. Don't judge by first impressions.
7. Trust your intuition.
8. Stand up for others and stand up for yourself.
9. Always be willing to forgive, but know when to walk away.

Thank you for taking the time to review my resume! Looking forward to working with you!

With respect,

Pierce Jorgensen
